

IWLS

International Wilderness Leadership School

7-Day Utah/Nevada Ski Mountaineering Leadership Course Information

Course Location

Salt Lake City is the starting and ending location for the course. Salt Lake boasts convenient access to some of the finest skiing on the planet, great accommodations, and is a gateway to multiple wilderness adventures. Utah has a series of lofty ranges that offer incredible mountaineering, skiing, and climbing. The Great Basin National Park on the Utah/Nevada border hosts numerous peaks and the area is dominated by Wheeler Peak. At 13,063 feet it gives participants a big mountain feel at a moderate altitude. The steep snow slopes, rock ridges, and remote wilderness experiences found in this area make it one of the best locations for developing mountaineering skills.

Course Goals

- Students will gain a mountaineering skill set and appropriate traveling techniques.
- Students will be able to use and teach state-of-the art minimum-impact camping and travel techniques.
- Students will be able to recognize terrain, Snowpack, and weather that contribute to the formation of avalanches and apply appropriate decision making skills regarding avalanche safety.

Course Itinerary

This is a flexible trip itinerary that shows the general progression of the trip. Our exact schedule will depend highly on the weather, strength of the group, and time of year.

Day 0: Pre-trip meeting at 6:00 PM (unless otherwise noted). Meeting location is subject to change and will be communicated to you in advance. We'll go over personal equipment and the plan for the trip.

Day 1: With an early morning start, we'll drive approximately 4 hours to Great Basin National Park. After organizing some gear, we'll travel to our base camp.

Day 2 – 3: We'll spend the first few days learning the fundamentals necessary for safe and efficient ski mountaineering.

Day 4-5: Utilizing the great weather of western Utah and Nevada, we'll attempt some exciting summit climbs above 12,000 feet. We'll also cover some more advanced skills as well as applying previously covered material.

Day 6: Continued application of new skill set and more skiing opportunities.

Day 7: We'll pack up our base camp and make our way back to Salt Lake City in the evening. Students will be evaluated by their instructors on their understanding of the IWLS curriculum.

A Typical Day

A typical day starts around 7am with breakfast and hot drinks. If a summit attempt is planned, you may find yourself awake just before sunrise. While water is heating you will most likely be preparing for the days' adventures.

You will play an integral part of the expedition team by setting up camp, cooking meals, or carrying a portion of the group gear. You may be leader of the day, responsible for planning the day, accomplishing objectives, or facilitating a lesson plan.

The day's activities will vary depending on weather, location, and progression of the course. We may work on developing your technical skills set, learn about different leadership styles, or get an alpine start and climb a large peak in the area. Regardless of the day's activities, it will be full of learning and adventure.

Dinner could be anything from thanksgiving to pasta, to backcountry pizza. Students often walk away from our courses with a newfound love for cooking good and original food.

The day will finish with a debrief session where we'll discuss the day's events, what you have learned, and how you'll be able to use your newfound skills in the near future.

IWLS

International Wilderness Leadership School

Course Curriculum

The International Wilderness Leadership Schools' educational model nurtures leadership development and creates an awareness of the guiding mentality that is essential for leading safe, fun adventures in the mountains. The combination of technical skills training, practical leadership experience and a true wilderness expedition make the IWLS curriculum world class.

We believe that experiences drive our learning and therefore we use formal and informal classes taught by both instructors and students. Instructors are eager to help facilitate the learning process but ultimately, how much you learn will be dependent on the amount of effort you put into the course.

A detailed curriculum will be provided at the beginning of the course. Below is a partial list of curriculum points that will be covered throughout your course.

IWLS General Curriculum

- **Leader of the Day:** Opportunities to lead the group will be abundant and you'll have the time to learn and practice multiple styles of leadership.
- **Situational Based Decision Making:** Over the course of 12 days, we'll discover ways to make effective and safe decisions in the field.
- **Focused and "Big Picture" Awareness:** Learn to identify objective and subjective hazards in a backcountry setting.
- **Logistics:** Develop the ability to efficiently plan and pack for an extended expedition in the backcountry.
- **Communication Skills:** Learn to communicate to a wide variety of audiences and provide constructive and appropriate feedback during daily group debriefs.
- **Teaching and Lesson Plans:** You'll have the opportunity to develop lesson plans, teach in front of the group, and learn the importance of progressions for teaching technical skills and leadership.
- **Expedition Behavior and Group Dynamics:** As this course is a true wilderness expedition, interactions between group members need to be supportive and contribute to the efficacy of the group. Learn the finer points of teaching these facilitation skills.
- **Camp Set-up and Maintenance:** Mastering these essential skills will prove valuable whether you are pitching a tent in gale force winds or melting snow for drinking water.
- **Nutrition and Cooking:** A healthy diet is vital for maintaining energy throughout an expedition. Learn to appropriately prepare nutritional and tasty backcountry meals.
- **Navigation:** Learn how to take a bearing, read a topographical map, triangulate your position, and navigate in a whiteout.
- **Weather:** Will the storm arrive in the next 12 hours, or the next 48? Understanding weather patterns and trends will help you plan successful trips in a wilderness setting.
- **Leave No Trace® Ethics:** As adventurers in some of the most pristine environments on the planet it is our duty to respect the natural world.
- **Natural and Cultural History:** Having a strong understanding of cultural history, flora, and fauna is an integral part of leading people in an outdoor environment. You'll learn some of the botany, ecology, and geology that apply to this remarkable area.

IWLS

International Wilderness Leadership School

IWLS Mountaineering Curriculum

- **General Mountaineering Skills:** The mountain environment is an exciting and potentially dangerous place. You'll discover how to travel on the steep mountain slopes using equipment such as an ice axe and crampons as well as how to teach these skills to your fellow students.
- **Anchors:** Anchor building is a fun yet complex subject. We'll examine single, double, triple and complex anchors, and their different applications. Learn how to place anchors in snow, rock, and ice.
- **Ropes:** 50 meters or 70 meters? 8.0mm or 10.5mm? Single, double or twin? These are all questions you'll be able to effectively answer. We'll also learn how to care for and maintain these important pieces of equipment.
- **Knots:** Learn the appropriate applications for the figure 8, water knot, double fisherman, bowline, and other essential climbing knots.
- **Belaying:** Should we use a fixed belay or a running belay? Our team will learn and practice the finer points of different belay techniques such as the hip belay, running belay, boot axe belay, fixed belay, and more!
- **Ascending:** Fixed lines are an important tool for large groups and guiding applications. We'll learn how to efficiently use, build and maintain them.
- **Rappelling:** Rappelling down a steep rock face is a thrilling moment and our team will learn how to do it safely. We'll also look at different methods for teaching rappelling and dealing with incapacitated climbers.
- **Rope Teams:** Rope team travel is a complicated endeavor that requires skill, technique and teamwork. We'll cover everything from prussic arrangement to team management.
- **Crevasse Rescue:** Traveling in glaciated terrain requires that every member of the team be proficient in crevasse rescue. We'll learn how to get a teammate out of a crevasse quickly and efficiently.
- **Technical Climbing:** Rock climbing, ice climbing and steep snow climbing are all included in the IWLS curriculum.
- **Top Rope Setup:** Top ropes allow people to push their limits and learn solid climbing technique in a fun and safe environment. We'll cover in-depth sight selection, rope management and group management.
- **Escaping the Belay:** What happens when things go bad? We'll practice escaping the belay and getting to the aid of an injured climber.
- **Short Roping:** Learn different applications of short roping technique and times and places to utilize it.
- **Sleds:** Key for long expeditions in the mountains. Learn how to maneuver, pack, and construct expedition sleds.
- **Timing:** In the mountains, timing is everything: when to leave camp, when to turn around, and when to push for the summit. Time management is a critical component of safe travel and plays into many aspects of mountaineering.

IWLS

International Wilderness Leadership School

IWLS Skiing & Snowboarding Curriculum

- **Equipment:** Learn the basics of skiing and snowboarding equipment, avalanche safety gear, and how to use and repair your gear efficiently.
- **Skiing & Snowboarding Ability Assessment:** Learn how to assess the abilities of others so you can lead people into the appropriate types of terrain.
- **Skiing & Boarding Instruction:** Modeling and good communication is essential for helping guests develop their skiing and snowboarding skills.
- **Site Selection:** Learn how to choose the appropriate terrain and identify hazards to facilitate a safe, fun time in the mountains.
- **Group Management:** Effective group management for a group of skiers and riders can be difficult. Learn communication tools and techniques for keeping a group safe.
- **Snow Conditions:** Whether skiing deep powder, spring corn, or breakable crust, learn how to identify variable conditions and employ different techniques to enjoy them safely.
- **Routefinding:** Both descents and ascents demand good routefinding skills. You'll develop your hazard assessment and navigation skills to be able to find the safest, most efficient route.
- **Skinning:** Develop your kick turns, edging, and other skinning techniques to climb snow slopes efficiently.
- **Steep skiing:** Jump turns, belayed skiing, and self-arrest are some topics that we'll cover concerning steep skiing.

IWLS Avalanche Curriculum

- **Avalanche Statistics:** Can you trigger an avalanche on a 10 degree slope? You'll learn the answer to these and many more questions throughout the avalanche curriculum.
- **Avalanche Characteristics:** We'll examine loose snow, wet snow, soft slab, and hard slab avalanches along with some potential triggers. You'll learn the definition of terms such as stauchwall, alpha angle, and bed surface.
- **Avalanche Pyramid:** Terrain, weather, snow pack, and human factors all play into the creation of an avalanche. Develop your decision making skills by breaking down avalanche danger assessment into these components.
- **Snow Stability Evaluation:** Is this snow capable of avalanching? Learn tests such as compression test and rutschblock test that will help you evaluate layers within the snowpack. Develop your documentation skills for accurate recording and analysis of information.
- **Safe Winter Travel:** As a group, we will travel safely through avalanche terrain. Considerations will include cornices, equipment selection, route finding, campsite selection, and effective communication.
- **Avalanche Rescue:** Someone buried in an avalanche has an 87% chance of survival if found within the first fifteen minutes. We'll practice using probes, beacons, and effective search patterns in order to quickly and efficiently find a buried person.

IWLS

International Wilderness Leadership School

Journal Writing

Keeping a wilderness journal can help students to record, reflect, and gain from experiences throughout the expedition. The following are examples of topics that may be assigned throughout the course: First-Aid SOAP notes, incident management forms, leadership analyses, trip reports, lesson plans and decision making analyses.

Evaluation and Grading

Students who take this course for credit will receive a letter grade. Grading is a measurement of one's knowledge of material, participation, written and oral communication, and one's judgment and awareness. Students will be evaluated on their skills, level of participation, their knowledge and awareness of their own abilities as outdoor leaders, their level of judgment as applied to decisions, and written projects assigned during the trip. Students that don't take the course for credit will receive a written instructor evaluation in place of a grade

Certifications

Upon completion of the 7-day ski/snowboard mountaineering leadership course, student may be eligible for the following certifications.

IWLS Level 1 Avalanche Certification*

International Wilderness Leadership School

IWLS 7 Day Guide Training Certificate of Completion

International Wilderness Leadership School

*Dependent on weather and season

Experts in **Technical Instruction**
and **Outdoor Leadership Training**
