

IWLS

International Wilderness Leadership School

Argentina Rock Climbing Information

Course Overview

The Cajón de Arenales, is an incredible alpine valley situated just an hour south of Mendoza. It has some of the highest quality granite in the area and offers a range of great crack climbs, tenuous sport routes, and long, multi-pitch alpine climbs. The warm austral summer days, and plenty of sunshine make this a perfect alpine climbing environment to develop leadership guiding skills and technical competence.

You'll practice leading on splitter cracks, top out on airy spires with incredible mountain vistas, and become competent at self-rescue. Whether learning route finding, setting up a hauling system, or simply enjoying a quality sport route in the sun, Arenales offers the ideal international climbing classroom, without the crowds.

Course Location

The central Andes rise up dramatically from the plains of Argentina. The high desert of the eastern side, complete with towering granite spires, raging rivers and huge glaciated mountains, is a wilderness with limitless exploration and adventure potential. The beautiful city of Mendoza, Argentina, just east of the Andes, is the starting and ending location for IWLS Argentina courses. From here, you'll journey to our expedition center in Penitentes, about 20 miles from Aconcagua, and surrounded by a vast mountain wilderness landscape.

Course Goals

- Students will gain a strong technical rock climbing techniques.
- Students will be able to use and teach state-of-the art minimum-impact camping and travel techniques.
- They will be able to exercise good quality judgment and decision-making skills within a leadership position to avoid potential accident and survival situations and develop a comprehensive understanding of safety considerations in Argentina.

IWLS

International Wilderness Leadership School

- They will be able to recognize their own leadership abilities and limitations within the context of a group. Students will be able to demonstrate the ability to make decisions and lead small groups in an alpine rock environment.
- Students will have a comprehensive understanding of risk management issues associated with guiding in a vertical rock environment.

Course Itinerary

Day 0: Arrive into Mendoza, Argentina. Generally we'll have a 6:00pm meeting the evening before the course.

Day 1: We'll go over equipment and food for the next 12 days, and travel from Mendoza, south towards the Cajon de Arenales. The evening will find us setting up camp beneath towering granite walls.

Day 2 - 5: After reviewing the basics, you'll dive into a progressive hands on curriculum designed to create competent and confident leaders in a vertical environment. You'll practice building complex anchors, self rescue, and mock leading on a series of sport, trad, and alpine rock routes.

Day 6 - 11: Towards the end of the rock course, you'll apply your skills on multi-pitch alpine routes in the Arenales basin. You'll continue to develop your leadership and routefinding skills in this amazing location.

Day 12: Return to Mendoza

A Typical Day

A typical day starts around 6am with breakfast and hot drinks. If an exposed crossing or summit attempt is planned, you may find yourself awake just before sunrise. While water is heating you will most likely be preparing for the days' adventures. You will play an integral part of the expedition team by setting up camp, cooking meals, or carrying a portion of the group gear. You may be leader of the day, responsible for planning the day, accomplishing objectives, or facilitating a lesson plan.

The day's activities will vary depending on weather, location, and progression of the course. We may work on developing your technical skills set, learn about different leadership styles, or get an early start and summit a 18,000 foot peak in the Andes. Regardless of the day's activities, it will be full of learning and adventure. Dinner could be anything from thanksgiving to pasta, to local Argentine fare. Students often walk away from our courses with a newfound love for cooking good and original food.

The day will finish with a debrief session where we'll discuss the days' events, what you learned, and how you'll be able to use your newfound skills in the near future.

Course Curriculum

The International Wilderness Leadership Schools' educational model nurtures leadership development and creates an awareness of the guiding mentality that is essential for leading safe, fun adventures in the mountains. The combination of technical skills training, practical leadership experience and a true wilderness expedition make the IWLS curriculum world class.

We believe that experiences drive our learning and therefore we use formal and informal classes taught by both instructors and students. Instructors are eager to help facilitate the learning process but ultimately, how much you learn will be dependent on the amount of effort you put into the course.

A detailed curriculum will be provided at the beginning of the course. Below is a partial list of curriculum points that will be covered throughout your course.

IWLS Rock Climbing Curriculum

- **Knots:** Learn the appropriate applications for the figure 8, water knot, double fishermen, bowline, and other essential climbing knots.
- **Climbing Technique:** Whether stemming an inside corner, jamming an off-width, or friction climbing on a blank slab, you'll learn the techniques to climb on a variety of different features.
- **Belaying:** Should we use a fixed belay or a running belay? Our team will learn and practice the finer points of different belay techniques such as the fixed belay, running belay, hip belay or munter hitch.
- **Rappelling:** Rappelling down a steep rock face is a thrilling moment and our team will learn how to do it safely. We'll also look at different methods for teaching rappelling and dealing with incapacitated climbers.

International Wilderness Leadership School

- **Ropes:** 50 meters or 70 meters? 8.0mm or 10.5mm? Single, double or twin? These are all questions you'll be able to effectively answer. We'll also learn how to care for and maintain these important pieces of equipment.
- **Top Rope Setup:** Top ropes allow people to push their limits and learn solid climbing technique in a fun and safe environment. We'll cover site selection, rope management and group management.
- **Ascending & Descending:** Fixed lines are an important tool for large groups and guiding applications. We'll learn how to efficiently build, use and maintain them.
- **Route Selection:** Where to set up the fixed belay? How to avoid objective hazards? How to select the most appropriate route from far below? You'll learn the answer to these questions and more as we climb a variety of established routes in addition to possible first ascents.
- **Rock Protection:** Pitons, nuts, cams, hexes... learn the nuances of quality placements. You'll have the opportunity to place protection in a variety of settings and rock quality.
- **Anchors:** Anchor building is a fun, yet intricate subject. We'll examine single double, triple and complex anchors, and their different applications.
- **Objective Hazards:** Loose rock and lightning storms are some of the objective hazards that exist for rock climbers. Learn to manage these hazards and climb safely when conditions don't cooperate.
- **High Angle Rescue:** What happens when things go bad? We'll practice escaping the belay and getting to the aid of an injured climber.
- **Multi-pitch Climbing:** Towards the end of the course, you'll put your technical skills to the test on multi-pitch climbs, refining skills such as belay site selection, rope management and route finding.

IWLS General Curriculum

- **Leader of the Day:** Opportunities to lead the group will be abundant and you'll have the time to learn and practice multiple styles of leadership.
- **Logistics:** Develop the ability to efficiently plan and pack for an extended expedition in the backcountry.
- **Communication Skills:** Learn to communicate to a wide variety of audiences and provide constructive and appropriate feedback during daily group debriefs.
- **Teaching and Lesson Plans:** You'll have the opportunity to develop lesson plans, teach in front of the group, and learn the importance of progressions for teaching technical skills and leadership.
- **Expedition Behavior and Group Dynamics:** As this course is a true wilderness expedition, interactions between group members need to be supportive and contribute to the efficacy of the group. Learn the finer points of teaching these facilitation skills.
- **Camp Set-up and Maintenance:** Mastering these essential skills will prove valuable whether you are pitching a tent in gale force winds or melting snow for drinking water.

- **Nutrition and Cooking:** A healthy diet is vital for maintaining energy throughout an expedition. Learn to appropriately prepare nutritional and tasty backcountry meals.
- **Weather:** Will the storm arrive in the next 12 hours, or the next 48? Understanding weather patterns and trends will help you plan successful trips in a wilderness setting.
- **Leave No Trace® Ethics:** As adventurers in some of the most pristine environments on the planet it is our duty to respect the natural world.
- **Natural and Cultural History:** Having a strong understanding of cultural history, flora, and fauna is an integral part of leading people in an outdoor environment. You'll learn some of the botany, ecology, and geology that apply to this remarkable area.

Journal Writing

Keeping a wilderness journal can help students to record, reflect, and gain from experiences throughout the expedition. The following are examples of topics that may be assigned throughout the course: First-Aid SOAP notes, incident management forms, leadership analyses, trip reports, lesson plans and decision making analyses.

Evaluation and Grading

Students who take this course for credit will receive a letter grade. Grading is a measurement of one's knowledge of material, participation, written and oral communication, and one's judgment and awareness. Students will be evaluated on their skills, level of participation, their knowledge and awareness of their own abilities as outdoor leaders, their level of judgment as applied to decisions, and written projects assigned during the trip. Students that don't take the course for credit will receive an evaluation in place of a grade.

Certifications

Upon completion of the 12-day Argentina rock climbing leadership and guide training course, student may be eligible for the following certifications:

12 Day Guide Training Certificate of Completion
