

Alaska Wilderness First Responder (WFR) Equipment List

The weather in Alaska and the Yukon can be volatile, so clothing systems need to be capable of meeting the demands of an ever-changing environment. A layering system, which allows articles of clothing to be added or subtracted as the weather changes, has proven most versatile. The clothing items listed below should layer together to provide appropriate insulation in the most demanding conditions. Because it may snow or rain, materials used in clothing should keep you warm even if they are wet. Synthetics such as polypropylene, Capilene, Synchilla, fleece, and pile are best, wool will also work. Cotton, with the exception of a t-shirt for the sun, is unacceptable. Please test out your gear before you arrive in Haines.

		Upper Body Layers	
		important components of a good layering system. They should be comformed to a sun shirt while hiking on warm days.	ortable,
Equipment	Quantity	Comments	Rental
Base Layers	2	One silk weight and one heavy weight top made of synthetic material that can be layered together to increase warmth. A light- colored silk weight (white/tan/light blue, etc.) is a good idea because it will decrease the amount of solar radiation (warmth) that your shirt absorbs. Conversely, your mid-weight base-layers should be darker so that they do absorb the sun's warmth. <u>Mountain Hardwear</u> makes good lightweight, wicking base layers.	-
Tee Shirt	1	To be worn as a sun shirt while hiking at lower elevations. Synthetic fabric is the way to go, and can double as a bandana or extra sun protection under a baseball cap.	-
Medium Weight Top	1	To be worn over the base layers and should be synthetic or wool (a soft shell is an acceptable substitute). Both <u>Black Diamond</u> and <u>Mountain Hardwear</u> offer great mid-weight layers.	-
Synthetic Down Parka	1	In a maritime climate in the mountains, a burly synthetic parka will be your best friend on those cold wet nights or windy summit mornings. It should easily fit over all layers. A down jacket with a water proof finish is acceptable, but if it gets wet you won't be happyor warm. The <u>Mountain Hardwear B'Layman Jacket</u> or <u>Black Diamond Stance Belay Parka</u> are both solid options.	YES
Outer Wear	1	A jacket made of waterproof / breathable material such as Gore-Tex is vital for keeping you warm and dry. It needs to fit over all layers. <u>Mountain Hardwear shells</u> are breathable, dry, and windproof.	-

Lower Body Layers						
Lower body layers should be versatile and easy to change into and out of under changing weather conditions.						
Equipment	Quantity	\square	Comments	Rental		
Base Layers	2		One silk weight and one heavy weight bottom layer made of			
Dase Layers	2		synthetic material that can be layered together to increase warmth.	_		
Fleece or Synthetic Pants	1		These should be either fleece or synthetic down. If the pants have side zips, it will make your life a lot easier by allowing you to layer without removing your foot wear. We recommend the <u>Mountain</u> <u>Hardwear Compressor Pant</u> or the <u>Black Diamond Stance Belay</u> <u>Pant</u> .	-		
Shorts or Lightweight Pants	1		These are optional, but are nice to wear at lower elevations, in town, or as additional layering options. Cotton is unacceptable; synthetic will dry faster and be more comfortable for long periods of wear. A light softshell pant could work as well. <u>Mountain Hardwear</u> makes great pants.	-		
Outer Wear	1		Pants made of waterproof / breathable material such as Gore-Tex are vital for keeping you warm and dry. They need to fit over all layers and should have side zips. <u>Mountain Hardwear</u> shell pants and bibs work great.	-		
hands and feet are the	e most suscej specif	ptible	crucial. We lose a massive percentage of body heat through our heads, to inconveniences like trench-foot. Developing a system that works for eds takes time; this guide is a good place to start.	r your		
Equipment	Quantity	$\mathbf{\nabla}$	Comments	Rental		
Warm-Hat	2		Should be made of synthetic material or wool, cotton is unacceptable. Should layer underneath a climbing helmet. <u>Mountain Hardwear</u> has a wide selection of warm hats.	-		
Sun-Hat	1		The sun can be very bright especially with reflection off the water, the more protection your cap offers from the sun the better.	-		
Sunglasses	1		Dark lenses are a must. The sun can be very bright and can cause permanent eye damage.	-		
Light Weight Gloves	1		Windstopper fleece works best. Work gloves with a water proof palm are nice to have along when dexterity is more important than warmth. 'Dura-Therm' or like models (synthetic glove with rubber palm & fingers) work well, just ensure you find the warmest model available. <u>Mountain Hardwear</u> and <u>Black Diamond</u> make great gloves.	-		
Heavy Weight Gloves/Mitts	1		Removable shell is a must. These should be warm, water-proof and breathable, with removable liners for easy drying. <u>Black Diamond</u> and <u>Mountain Hardwear</u> have durable expedition gloves.	-

Lin D 1	1.0		Charlel have some for CDE material	
Lip Balm	1-2		Should have some type of SPF protection.	-
Sunscreen	4-8oz.		Should be SPF 30 or higher and be waterproof.	-
Personal Med-Kit	1		A personal prescription of a broad-spectrum antibiotic like Ciprofloxacin or Azithromycin is REQUIRED. Your kit should also include ALL personal medications, as well as a stash of Ibuprofen, Aspirin, Bandaids, and Neosporin. A group Med-Kit will be available for everyone, however bringing a personal kit is mandatory. If you have any questions please don't hesitate to call us at 1.800.985.4957	-
Water Bottles	2		Wide mouth 1-liter Lexan bottles ('Nalgene') work best.	-
Bandana or ' <u>Buff</u> '	1		Used for extra sun-protection. Your tee-shirt can be used in place of a bandana if you are trying to shave weight (which is a good thing).	-
Stuff Sacks	2-4		For organizing your gear inside of your backpack.	-
Garbage & Ziploc bags	variety		To keep your gear dry inside of your kayak. (Line your stuff sack with a garbage bag before you stuff your sleeping bag in there.)	-
			Optional	
Equipment	Quantity	Ы	Comments	Rental
Sleeping Bag Liner	1		For increased warmth.	-
Pee Bottle	1		1-liter wide-mouth Lexan with a SECURE LID. Nice to have when there is really inclement weather outside.	-
Energy/Candy Bars	0-20		Bring bars that taste good!	-
Moist Towelettes	0-20		This will be as close to a shower as you will get, we recommend one wipe per day.	-
Book	1-2		Leave the 15 pound hardcover at home.	-
Bug Spray	1		The bugs at lower elevations can be bothersome during certain seasons.	-
Camera	2-4		Digital or Film. If you are buying a digital camera; having a view finder allows you to take photos when it is too bright to see the screen and helps save batteries, also having a camera that is compatible with AA's allows you to bring extra batteries that don't	-

Additional Information

We use gear from these select companies on every trip we run! Their gear has proven itself again and again on the highest mountains, roughest water, and steepest ice. We endorse these companies because they make gear that is functional and reliable.

We provide the following: tents, group climbing equipment, expedition first aid kits, cooking equipment, and trip food.

Please don't hesitate to call us with any questions 1.800.985.4957
