

Argentina Mountaineering Equipment List

The weather in the mountains can be volatile. Clothing systems need to be capable of meeting the demands of an ever-changing environment. A layering system, which allows articles of clothing to be added or subtracted as the weather changes, has proven most versatile. The clothing items listed below will work together to provide appropriate insulation in the most demanding conditions. Because it can snow, or rain, materials used in clothing should keep you warm even if they are wet. Synthetics such as polypropylene, Capilene, Synchilla, fleece, and pile are best, wool will also work. Cotton, with the exception of a t-shirt for the sun, is unacceptable. Please test out your gear before you arrive in Argentina.

			Upper Body Layers	
			important components of a good layering system. They should be comfo	ortable,
			ton is unacceptable except for a sun shirt while hiking on warm days.	
Equipment	Quantity	\square	Comments	Renta
Base Layers	2		One silk weight and one heavy weight top made of synthetic material that can be layered together to increase warmth. A light- colored silk weight (white/tan/light blue, etc.) is a good idea because it will decrease the amount of solar radiation (warmth) that your shirt absorbs. Conversely, your mid-weight base-layers should be darker so that they do absorb the suns warmth. <u>Mountain Hardwear</u> makes good lightweight, wicking base layers.	-
Tee Shirt	1		To be worn as a sun shirt while hiking at lower elevations. Synthetic fabric is the way to go, and can double as a bandana or extra sun protection under a baseball cap.	-
Medium Weight Top	1		To be worn over the base layers and should be synthetic or wool (a soft shell is an acceptable substitute). Both <u>Black Diamond</u> and <u>Mountain Hardwear</u> offer great mid-weight layers.	-
Heavy Weight Top	1		To be worn over the base layers and medium weight top and should be synthetic or wool. Both <u>Black Diamond</u> and <u>Mountain Hardwear</u> make nice thick layers.	-
Synthetic Down Parka	1		In the high mountains, a burly insulating parka will be your best friend on those cold wet nights or windy summit mornings. It should easily fit over all layers. A down jacket with a water proof finish is suitable for dry cold climates like Argentina, but once if gets wet it loses its insulation! The <u>Mountain Hardwear Phantom</u> and <u>Black</u> <u>Diamond Stance Belay Parka</u> are both solid options.	YES
Outer Wear	1		A jacket made of waterproof / breathable material such as Gore-Tex is vital for keeping you warm and dry. It needs to fit over all layers. <u>Mountain Hardwear shells</u> are breathable, dry, and windproof.	-

Lower Body Layers Lower body layers should be versatile and easy to change into and out of under changing weather conditions.						
Base Layers	2		One silk weight and one heavy weight bottom layer made of			
Base Layers	2		synthetic material that can be layered together to increase warmth.	-		
Underwear	3-4 pairs		Synthetic briefs and underwear will keep you comfortable and			
			hygienic during high output days. Plan on bringing one pair per 4-6	-		
			days of use.			
			These should be either fleece or synthetic down. If the pants have			
			side zips, it will make your life a lot easier by allowing you to layer			
Fleece or Synthetic Pants	1		without removing your foot wear. We recommend the Mountain	-		
			Hardwear Compressor Pant or the Black Diamond Stance Belay			
			Pant.			
			These are optional, but are nice to wear at lower elevations, in town,			
Sharta ar Lightwaight			or as additional layering options. Cotton is unacceptable; synthetic			
Shorts or Lightweight Pants	1		will dry faster and be more comfortable for long periods of wear. A	-		
Pants			light softshell pant could work as well. Mountain Hardwear makes			
			great pants.			
	1		Pants made of waterproof / breathable material such as Gore-Tex			
Orates Ween			are vital for keeping you warm and dry. They need to fit over all			
Outer Wear			layers and should have side zips. Mountain Hardwear shell pants	-		
			and bibs work great.			
			lead, Neck, Hands & Feet

Light Weight Gloves	1		Windstopper fleece works best. Work gloves with a water proof palm are nice to have along when dexterity is more important than warmth. 'Dura-Therm' or like models (synthetic glove with rubber palm & fingers) work well, just ensure you find the warmest model available. <u>Mountain Hardwear</u> and <u>Black Diamond</u> make great gloves.	-
Heavy Weight Gloves/Mitts	1		Removable shell is a must. These should be warm, water-proof and breathable, with removable liners for easy drying. <u>Black Diamond</u> and <u>Mountain Hardwear</u> have durable expedition gloves.	-
Socks	3-4		These should be synthetic or wool. Having a mix of light and heavy weight socks is nice to adjust to variable weather.	-
Mountaineering Boots	1		Plastic boots with a removable liner work best because they are easy to dry out and extremely warm. They also need to be fully crampon compatible. <u>Koflach</u> , <u>Scarpa</u> or <u>La Sportiva</u> all make good boots. Please don't hesitate to call us before making any major purchases.	YES
Gaiters	1		These should fit over your mountaineering boots, and are used to keep water/snow/rocks out. They should be tall and water/abrasion resistant. Both <u>Black Diamond</u> and <u>Mountain Hardwear</u> make great gaiters.	-

IWLS

Water Bottles	2		Wide mouth 1-liter Lexan bottles ('Nalgene') work best.	-
Bandana or ' <u>Buff</u> '	1		Used for extra sun-protection.	-
Stuff Sacks	2-4		For organizing your gear inside of your backpack. Consider using compression sacks for both your sleeping bag and clothes to maximize usage of space. Sea to Summit makes great waterproof stuff sacks.	-
Garbage & Ziploc bags	variety		An invaluable method used to keep your gear dry inside of your pack. (i.e. line your stuff sack with a garbage bag before you stuff your sleeping bag in there)	-
			Optional	
Equipment	Quantity	Ы	Comments	Rental
Summit Pack	-		Used on day excursions, should be between 35L - 55L (many people use their big pack for this purpose). Both <u>Mountain Hardwear</u> and <u>Black Diamond</u> offer great options in this size range.	-
Ascender or Tibloc	0-2		<u>Black Diamond</u> ascenders or a <u>Petzl</u> Tibloc are great for ascending/descending fixed lines and crevasse rescue.	-
Locking Carabiners	2		Small, lightweight pear-shaped carabiners used for rescue practice and building anchors. <u>Black Diamond</u> makes great carabiners.	-
Belay Device	1		A standard belay plate can be used for technical climbing and rappelling. The ATC Guide is a great option.	-
Pulleys	2		Climbing pulleys are used to reduce friction on the rope during rescue practice. Petzl has some good options.	-
Camp Booties	1 pair		A good pair of synthetic fill <u>Camp Booties</u> will keep your feet warm and dry after big days in winter environments.	-
Hand Warmers	4		A good thing to keep in your pack for those brisk alpine starts.	-
Sleeping Bag Liner	1		For increased warmth.	-
AA and AAA batteries	4 pair		Replacements for both your avalanche beacon & headlamp	-
Pee Bottle	1		1-liter wide-mouth Lexan with a SECURE LID. Nice to have when there is really inclement weather outside.	-
Energy/Candy Bars	0-20		Bring bars that taste good!	-
Moist Towelettes	0-20		This will be as close to a shower as you will get, we recommend one wipe per day.	-
Book	1-2		Leave the 15 pound hardcover at home.	-
Camera	1		A simple point and shoot works great. Larger DSLR cameras are generally discouraged due to weight and size. A camera that is compatible with AA's allows you to bring extra batteries that don't cost an arm and a leg. Otherwise it's a good idea to pack an extra batter pack or two.	-

Additional Information

We use gear from these select companies on every trip we run! Their gear has proven itself again and again on the highest mountains, roughest water, and steepest ice. We endorse these companies because they make gear that is functional and reliable.

We provide the following: tents, group climbing equipment, expedition first aid kits, cooking equipment, and trip food.

Please don't hesitate to call us with any questions 1.800.985.4957
