Argentina Rock Climbing Course Equipment List

The weather in Argentina can be volatile. Clothing systems need to be capable of meeting the demands of an ever-changing environment. A layering system, which allows articles of clothing to be added or subtracted as the weather changes, has proven most versatile. The clothing items listed below will work together to provide appropriate insulation in the most demanding conditions. Because it can snow or rain, materials used in clothing should keep you warm even if they are wet. Synthetics such as polypropylene, Capilene, Synchron, fleece, and pile are best, wool will also work. Cotton, with the exception of a t-shirt for the sun, is unacceptable. Please test out your gear before you arrive in Argentina.

Upper Body Layers

Upper body layers are some of the most important components of a good layering system. They should be comfortable, lightweight and breathable. Cotton is unacceptable, except for a sun shirt while hiking on warm days.

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Base Layers	2		One silk weight and one heavy weight top made of synthetic material that can be layered together to increase warmth. A light-colored silk weight (white/tan/light blue/etc.) is a good idea, because it will decrease the amount of solar radiation (warmth) that your shirt absorbs. That being said, your mid-weight base layers should be darker so that they do absorb the sun's warmth. Mountain Hardware makes good lightweight, wicking base layers.	-
Tee Shirt	1		To be worn as a sun shirt while hiking at lower elevations. Synthetic fabric is the way to go, and can double as a bandana or extra sun protection under a baseball cap.	-
Medium Weight Top	1		To be worn over the base layers and should be synthetic or wool. A soft shell is an acceptable substitute. Both Black Diamond and Mountain Hardware offer great mid-weight layers.	-
Heavy Weight Top	1		To be worn over the base layers and medium weight top and should be synthetic or wool. Both Black Diamond and Mountain Hardware make nice thick layers.	-
Synthetic Down Parka	1		In a maritime climate in the mountains, a burly synthetic parka with a hood will be your best friend on those cold wet nights or windy summit mornings. It should easily fit over all layers. A down jacket with a water proof finish is acceptable, but if it gets wet you won't be happy. . . or warm. The Mountain Hardware B' Layman Jacket or Black Diamond Stance Belay Parka are both solid options.	YES
Outer Wear	1		A jacket made of waterproof / breathable material such as Gore-Tex is vital for keeping you warm and dry. It needs to fit over all layers. Mountain Hardware shells are breathable, dry, and windproof.	-

Lower Body Layers

Lower body layers should be versatile and easy to change into and out of under changing weather conditions.

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Base Layers	2		One silk weight and one heavy weight bottom layer made of synthetic material that can be layered together to increase warmth.	-
Underwear	2-4 pairs		Synthetic briefs and underwear will keep you comfortable and hygienic during high output. Plan on bringing one pair per 4-6 days of use.	-
Fleece or Synthetic Pants	1		These should be either fleece or synthetic down. If the pants have side zips, it will make your life a lot easier by allowing you to layer without removing your foot wear. We recommend the Mountain Hardwear Compressor Pant or the Black Diamond Stance Belay Pant .	-
Shorts or Lightweight Pants	1		These are optional, but are nice to wear at lower elevations, in town, or as additional layering options. Cotton is unacceptable; synthetic will dry faster and be more comfortable for long periods of wear. A light softshell pant could work as well. Mountain Hardwear makes great pants.	-
Outer Wear	1		Pants made of waterproof / breathable material such as Gore-Tex are vital for keeping you warm and dry. They need to fit over all layers and should have side zips. Mountain Hardwear shell pants and bibs work great.	-

Head, Neck, Hands & Feet

Keeping your extremities warm & dry is crucial. We lose a massive percentage of body heat through our heads, and our hands and feet are the most susceptible to inconveniences like frostbite and trench-foot. Developing a system that works for your specific needs takes time; this guide is a good place to start.

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Warm-Hat	2		Should be made of synthetic material or wool, cotton is unacceptable. Should layer underneath a climbing helmet. Mountain Hardwear has a wide selection of warm hats.	-
Sun-Hat	1		The sun can be very bright (especially with reflection), the more protection your cap offers from the sun, the better.	-
Sunglasses	2		Dark lenses with good side protection are a must. The sun can be very bright (especially with reflection off of the water/snow/ice) and can cause permanent eye damage.	-
Light Weight Gloves	1		Windstopper fleece works best. Work gloves with a water proof palm are nice to have along when dexterity is more important than warmth. 'Dura-Therm' or like models (synthetic glove with rubber palm & fingers) work well, just ensure you find the warmest model available. Mountain Hardwear and Black Diamond make great gloves.	-

IWLS

International Wilderness Leadership School

Heavy Weight Gloves/Mitts	1		Removable shell is a must. These should be warm, water-proof and breathable, with removable liners for easy drying. Black Diamond and Mountain Hardware have durable expedition gloves.	-
Socks	2-3		These should be synthetic or wool. Having a mix of light and heavy weight socks is nice to adjust to variable weather.	-
Hiking Boots	1		Should be well broken in and waterproof. We recommend synthetic mountaineering boots. Please don't hesitate to call us if you have any questions about purchasing boots.	-
Rock Climbing Shoes	1		Snug comfortable fit.	YES

Technical Hardware

For technical gear we recommend [Black Diamond](#). We run their equipment on every mountain trip we operate, and find it to be among the best in the industry. For tents and sleeping bags we recommend [Mountain Hardware](#).

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Backpack	1		Should have a capacity of at least 5,000 cubic inches (or 80 Liters), and should be comfortable with 60 lbs. of weight. Mountain Hardware and Black Diamond packs are versatile and rugged. Please don't hesitate to call us before making any major purchases.	YES
Trekking poles	1		Lightweight and adjustable length work best. Black Diamond poles are a great fit.	YES
Lightweight Harness	1		Should fit over all layers and be comfortable weighted for an entire day. Adjustable leg loops are best. We recommend the Black Diamond Aspect (for men) or Lotus (for women) as a high quality four-season harness.	YES
Locking Carabineers	4		Standard aluminum locking carabineers (such as the Black Diamond Rocklock) are used for technical climbing and rescue practice. At least one of these should be round bar stock for ease of belaying.	-
Non-locking Carabiners	4		Oval or lightweight wiregate carabiners used for technical climbing systems. We use Black Diamond Carabiners .	-
6mm Cord	20 ft.		6mm accessory cord is used during anchors and rescue practice.	-
Belay Device	1		A belay device is used during belaying and rappelling. We recommend the Black Diamond ATC Guide for top-managed belay capabilities.	-
Sling	1		A sewn double shoulder length sling (120 cm/48 in) made of either nylon or Dyneema/Spectra/Dynex, etc. are used for technical climbing systems.	-
Ascender / Tibloc	2		Black Diamond ascenders or a Petzl tibloc are great for ascending/descending fixed lines and setting haul systems.	-
Helmet	1		Should be light weight and rated for rock climbing/ mountaineering. The BD Vector or Half Dome are great options.	YES

Large Duffel	1	<input type="checkbox"/>	Used for transporting gear in planes and vehicles on route to trip locale. 'Cordura' or other heavy duty nylon duffel bags are burly and handle large loads with ease. 6000 cubic inches (100 liters) or larger are best. Mountain Hardware and Black Diamond make tough expedition duffel bags.	-
--------------	---	--------------------------	--	---

Sleeping Bag & Pads

Having a good sleep system is essential in the mountains. While down bags are very warm and pack incredibly small, they lose all insulating properties when they get wet. In a mountain climate like Argentina a synthetic fill sleeping bag is a must.

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Sleeping bag	1	<input type="checkbox"/>	We recommend a synthetic fill bag with a comfort rating of 0 degrees Fahrenheit. Mountain Hardware bags work well. Please don't hesitate to call us before making any major purchases.	YES
Sleeping pads	2	<input type="checkbox"/>	A system of one compact inflatable pad (Thermarest) and one closed cell foam pad works best to insulate when sleeping on snow.	YES

Miscellaneous

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Passport	1	<input type="checkbox"/>	You need this to enter Argentina. You should also email yourself a scan and have 3 or 4 copies.	-
Watch	1	<input type="checkbox"/>	Should have an alarm. A cell phone will not work.	-
Journal	1	<input type="checkbox"/>	'Rite in the Rain' or similar water resistant paper work best.	-
Eating Utensils	-	<input type="checkbox"/>	Bowl & Spoon (Lexan or titanium work well), as well as a 14oz mug with a lid for hot drinks.	-
Headlamp	1	<input type="checkbox"/>	We recommend LED headlamps, because they are lightweight, long-lasting & durable. Bring extra batteries. . Black Diamond SPOT or ICON headlamps work great.	-
Toilet Paper	1	<input type="checkbox"/>	Bring your own in a Ziploc bag.	-
Iodine	1	<input type="checkbox"/>	A bottle of 'Polar-Pure' Crystals is the most convenient, but 'Potable Agua' works well also.	-
Personal Med-Kit	1	<input type="checkbox"/>	A personal prescription of a broad-spectrum antibiotic like Ciprofloxacin or Erithromycin is REQUIRED. Your kit should also include ALL personal medications, as well as a stash of Ibuprofen, Aspirin, Band-Aids, and Neosporin. A group Med-Kit will be available for everyone, however bringing a personal kit is mandatory. If you have any questions please don't hesitate to call us.	-
Blister Kit	1	<input type="checkbox"/>	This should include mole skin/foam and cloth athletic tape for personal use.	-
Lip Balm	1-2	<input type="checkbox"/>	Should have some type of SPF protection.	-
Sunscreen	4-8oz.	<input type="checkbox"/>	Should be SPF 30 or higher and be waterproof.	-
Water Bottles	2	<input type="checkbox"/>	Wide mouth 1-liter Lexan bottles ('Nalgene') work best.	-
Bandana or 'Buff	1	<input type="checkbox"/>	Used for extra sun-protection. Your t-shirt can be used in place of a bandana if you are trying to shave weight (which is a good thing).	-

IWLS

International Wilderness Leadership School

Stuff Sacks	2-4		For organizing your gear inside of your backpack.	-
-------------	-----	--	---	---

Garbage & Ziploc bags	variety		To keep your gear dry inside of your pack. (Line your stuff sack with a garbage bag before you stuff your sleeping bag in there.)	-
-----------------------	---------	--	---	---

Optional

Equipment	Quantity	<input checked="" type="checkbox"/>	Comments	Rental
Summit Pack	1		Used for daily climbs, should be between 35L - 55L. Both Mountain Hardware and Black Diamond offer some great climbing packs in this range. (Many people use their big pack for this purpose).	-
Chalk Bag	1		Climbing chalk reduces sweat on your hands and increases grip.	-
Hand Warmers	3		A good thing to keep in your pack for those brisk alpine starts.	-
Sleeping Bag Liner	1		For increased warmth.	-
Energy/Candy Bars	0-20		Bring bars that taste good!	-
Moist Towelettes	0-20		This will be as close to a shower as you will get, we recommend one wipe per day.	-
Book	1-2		Leave the 15 pound hardcover at home.	-
Camera	2-4		Digital or Film. If you are buying a digital camera, one with a view finder will allow you to take photos when it is too bright to see the screen and helps save batteries. A camera that is compatible with AA's allows you to bring extra batteries that don't cost an arm and a leg. Bring an extra memory card.	-

Additional Information

We use gear from these select companies on every trip we run! Their gear has proven itself again and again on the highest mountains, roughest water, and steepest ice. We endorse these companies because they make gear that is functional and reliable.

We provide the following: tents, group climbing equipment, expedition first aid kits, cooking equipment, and trip food.

Please don't hesitate to call us with any questions 1.800.766.3396
