

Utah Mountaineering Course Equipment List

The weather in Utah can be volatile. Clothing systems need to be capable of meeting the demands of an ever-changing environment. A layering system, which allows articles of clothing to be added or subtracted as the weather changes, has proven most versatile. The clothing items listed below will layer together to provide appropriate insulation in the most demanding conditions. Because it can snow or rain, materials used in clothing should keep you warm even if they are wet. Synthetics such as polypropylene, Capilene, Synchilla, fleece, and pile are best, wool will also work. Cotton is unacceptable. Please test out your gear before you arrive in Salt Lake City.

If you own any of the following "provided" personal gear, we encourage you to bring it to your course. This will allow you to become proficient with the gear you will continue to use after the course.

		mportant components of a good layering system. They should be comfo ton is unacceptable except for a sun shirt while hiking on warm days.	ortable,
Equipment	Quantity	Comments	Rental
Base Layers	2	One silk weight and one heavy weight top made of synthetic material that can be layered together to increase warmth. A light- colored silk weight (white/tan/light blue, etc.) is a good idea because it will decrease the amount of solar radiation (warmth) that your shirt absorbs. Conversely, your mid-weight base-layers should be darker so that they do absorb the sun's warmth. <u>Mountain Hardwear</u> makes good lightweight, wicking base layers.	-
Tee Shirt	1	To be worn as a sun shirt while hiking at lower elevations. Synthetic fabric is the way to go, and can double as a bandana or extra sun protection under a baseball cap.	-
Medium Weight Top	1	To be worn over the base layers and should be synthetic or wool (a soft shell is an acceptable substitute). Both <u>Black Diamond</u> and <u>Mountain Hardwear</u> offer great mid-weight layers.	-
Heavy Weight Top	1	To be worn over the base layers and medium weight top and should be synthetic or wool. Both <u>Black Diamond</u> and <u>Mountain Hardwear</u> make nice thick layers.	-
Synthetic Down Parka	1	In the mountains, a burly down parka with insulated hood will be your best friend on those bitter cold nights or windy summit mornings. It should easily fit over all layers. A down jacket with a water proof finish is better, because it will keep your down from getting wet. <u>Mountain Hardwear</u> makes a great goose down jacket. Feel free to call before making any major purchases.	YES

Outer Wear

A jacket made of waterproof / breathable material such as Gore-Tex

Stuff Sacks	2-4		For organizing your gear inside of your backpack. Consider using compression sacks for both your sleeping bag and clothes to maximize usage of space. <u>Sea to Summit</u> makes great waterproof stuff sacks.	-		
Garbage & Ziploc bags	variety		An invaluable method used to keep your gear dry inside of your pack. (Line your stuff sack with a garbage bag before you stuff your sleeping bag in there.)	-		
Optional						
Equipment	Quantity	\checkmark	Comments	Rental		
Summit Pack	-		Used on day excursions, should be between 35L - 55L (many people use their big pack for this purpose). Both <u>Mountain Hardwear</u> and <u>Black Diamond</u> offer some great climbing packs in this range.	-		
Ascender or Tibloc	0-2		Black Diamond ascenders or a Petzl tibloc are great for ascending/descending fixed lines and crevasse rescue.	-		
Locking Carabiners	2		Small, lightweight pear-shaped carabiners used for rescue practice and building anchors. <u>Black Diamond</u> makes great carabiners.	-		
Belay Device	1		A standard belay plate can be used for technical climbing and rappelling. The <u>ATC-Guide</u> is a great, versatile option.	-		
Pulleys	2		Climbing pulleys are used to reduce friction on the rope during rescue practice. <u>Black Diamond</u> makes a lightweight option.	-		
6mm Cord	20 ft.		6mm or 7mm Accessory cord is a versatile alpine tool.	-		
Camp Booties	1 pair		A good pair of synthetic fill camp booties will keep your feet warm and dry after big days in winter environments. <u>Sierra Designs</u> makes a great goose-down version with a rubberized bottom.	-		
Hand Warmers	4		A good thing to keep in your pack for those brisk alpine starts.	-		
Sleeping Bag Liner	1		For increased warmth.	-		
AA and AAA batteries	4 pair		Replacements for both your avalanche beacon & headlamp.	-		
Pee Bottle	1		1-liter wide-mouth Lexan with a SECURE LID. Nice to have when there is really inclement weather outside.	-		
Energy/Candy Bars	0-20		Bring bars that taste good!	-		
Moist Towelettes	0-20		This will be as close to a shower as you will get, we recommend one wipe per day.	-		
Book	1-2		Leave the 15 pound hardcover at home.	-		
Camera	1		If you are buying a digital camera; one with a view finder allows you to take photos when it is too bright to see the screen and helps save batteries. A camera that is compatible with AA's allows you to bring extra batteries that don't cost an arm and a leg. Otherwise, it's best to have 1 or 2 extra batteries. Bring an extra memory card.	-

Additional Information

We use gear from these select companies on every trip we run! Their gear has proven itself again and again on the highest mountains, roughest water, and steepest ice. We endorse these companies because they make gear that is functional and reliable.

We provide the following: tents, group climbing equipment, expedition first aid kits, cooking equipment, and trip food.

Please don't hesitate to call us with any questions 1.800.985.4957
